Latest Projects

Plusserver CloudHub

Role: UX / UI Designer

plusserver.com/en/cloudhub/

In charge of UI and UX design of a client data storage and management solution, starting from redesigning the whole website to implementing new features as well as new Product Dashboard.

Confluence, Jira were used for work tools and Figma incl. Figma Dev mode for design and handoff. User testings were done in cooperation with Product Owner internally and externally.

Advaneo Trusted Data Hub

Role: UX Designer

I defined the user flow, journey, persona and initial wireframes for a Trusted Data Hub project for a private data exchange between companies based on an existing Angular platform.

FileWise AI

Role: UX Designer

<https://uxfol.io/p/ilukin/9ad75baa>

I designed a concept-level productivity app that turns AI chats into structured, navigable projects using inline tagging and smart organisation features. It includes new prompt features not present in the current AI tools.
